

## Products Summary

The crane is used for nickel iron smelting feeding , high work duty ,high automation level it can finish whole feeding in set time of technological requirements.By means of the technologis which is independent research and development for our crop, swing patent 、 precise automatic positioning and automatic spreader ,realize automatic for whole feeding , the crane has automatic spot couple unhook feed shift etc, the whole process control by order,without supervisory control and operate.

## Technical Data

Capacity (t)	Span (m)	Lifting Height (m)	Work Duty	Hoisting Speed			
(m/min)	Crab Traveling Speed						
(m/min)	Trolley Traveling Speed						
(m/min)	Rail						
40	22.5	35	A8	2~20	3.4~34	5.2~52	QU80
50	19.5	40	2~20	3.5~35	5.2~52		
60	22.5	40	1.7~17	2.8~28	5-50		QU100
